

SPE[®] POSTS CONTENT FROM PREVIOUS ACCE CONFERENCE CDs ON WEBSITE – ACCESS AVAILABLE 24/7 AT NO COST

Papers and presentations as well as program guides from five of the first six years of the **SPE[®] Automotive Composites Conference & Exposition (ACCE)** are now available for viewing and downloading on the SPE Automotive Division's website at www.speautomotive.com/comp.htm. This large body of technical material is available online 24/7 at no cost to benefit OEM engineers, tier suppliers, material suppliers, industry consultants, university students studying composites technologies, and members of the media.

The papers and presentations available cover such materials technologies as long-fiber reinforced thermoplastics (LFRT), glass-mat thermoplastic (GMT), natural-fiber composites, bio-composites (using non-petroleum feedstock for the resin's monomer), nanocomposites, sheet-molding compound (SMC), and advanced carbon fiber composites. Topics covered include novel fabrication technologies, finishing, paint films, design and testing of composites, structural applications, and new uses for composites in ground-transportation applications. The papers have been submitted by representatives from transportation OEMs, tier suppliers, materials and additive/reinforcement suppliers, machinery OEMs, government / academic labs, media, and consultants from around the world. Content has been posted from the 2002-2006 conferences. SPE previously sold copies of ACCE conference CDs for \$100 USD per CD per year.

Held annually in the suburbs of Detroit, the ACCE has become the world's leading forum for automotive composites. The event's success is attributed to the fact that it provides an environment dedicated solely to discussion and networking about advances in the automotive composites industry. Its global appeal is evident in the diversity of exhibitors, speakers, and attendees who come to the conference from Europe, the Middle East, and Asia / Pacific as well as North America and who represent transportation OEMs and tier suppliers; composite materials, processing equipment, additives, and reinforcement suppliers; trade associations, consultants, university and government labs, media, and investment bankers. This year's conference will be held September 11-13, 2007 at the MSU Management Education Center in Troy, Mich.

For more information about the **SPE ACCE**, visit the Composites' Division website at www.4spe.org/communities/divisions/d39.php, or the Automotive Division's website at www.speautomotive.com/comp.htm, or contact the group at +1.248.244.8993, or write SPE Automotive Division, 1800 Crooks Road, Suite A, Troy, MI 48084, USA.
